[Nest Cup Box](#)

email us the measurement
at nestcupbox@gmail.com

we make a cup to fit!

First measure the angle or take a photo

Photos need to be straight on and from a distance for a more accurate angle if you can't do this outside try the attic

Good photo straight on
we can measure from

We can't measure
the angle from the
side or underneath

Good photo straight on in
the attic we can measure
from this

Select single, triple or 5 cups on the website nestcupbox.com

Single

Triple

5 Cup

Select Sparrow Topper, Wooden False Eaves or uPVC False Eaves

Deep eaves where you plan to fit them?

Eaves that are 20cm or deeper mean that you don't have to have a protective roof above your cups. A sparrow-topper roof is recommended to ensure the opening remains at 2cm.

However it is not for weather protection; it's small and designed only to keep the nest opening at 2 cm when the eaves don't allow the cup to sit flush

Shallow or no eaves?

If your eaves are less than 20cm in depth choose one of our false eaves options

Sparrows are a problem?

If you have a problem with sparrows taking over House Martin cups ensure that you select a cup with a false eave or a sparrow prevention topper roof to ensure the opening remains at 2cm
